## DETAILED ACTION

### *R spons to Amendm nt*

1. Claims 10, 25, 27-30, 34-35, 37-39 and 41 are pending.
2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
3. Applicant's arguments filed 5 September 2003 have been fully considered but they are not found persuasive.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 10, 25, 27-30, 34-35, 37-39 and 41 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim limitation "CYP3A4 enzyme" is ambiguous and confusing because it is not what is the metes and bounds of the term. The claims contain no structural limitations and the enzyme is described by name only which makes it unclear as to its metes and bounds. It is not clear whether "CYP3A4 enzyme" includes all the different types of cytochrome 450 enzymes.

Art Unit: 1646

***Claim Rejections - 35 USC § 102***

5. Claims 10, 25, 27-30, 34-35, 37-39 and 41 are rejected under 35 U.S.C. 102(e) as being anticipated by Evans et al. (US2003/0064430 A1).

Evans et al. teaches the method of identifying a ligand to the polypeptide SXR (page 6, paragraph 73). Evans et al. discloses SXR polypeptide (SEQ ID NO2) which is 100% identical to the claimed SEQ ID NO:14 domain (page 3). Evans et al. discloses cytochrome P450 expression and CYP3A expression as activated by various activators (page 1, columns 9). The name of the enzyme "CYP3A4" does not distinguish over the art because no structural differentiation is claimed.

6. No claims allowed.
